

Heber Valley Corridor ENVIRONMENTAL IMPACT STATEMENT

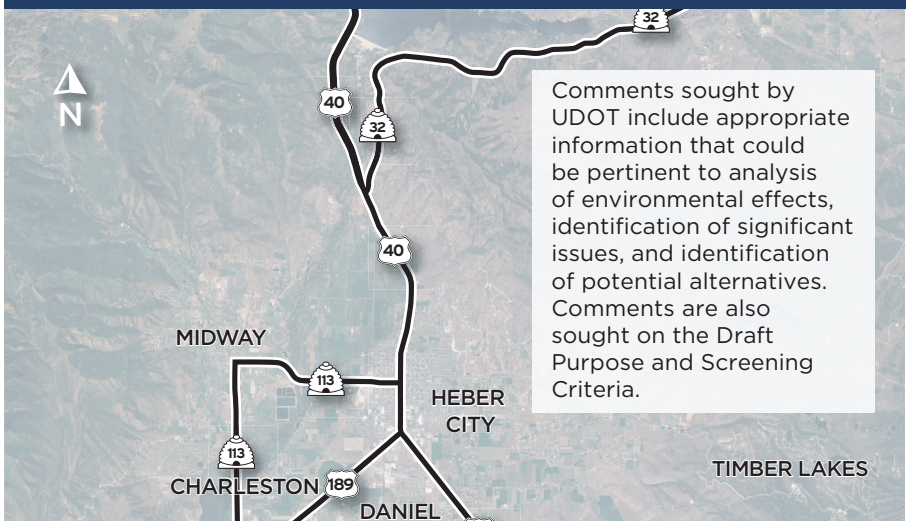

The Utah Department of Transportation's (UDOT) mission is to keep Utah moving while enhancing quality of life through transportation improvements in our state. UDOT is conducting an Environmental Impact Statement (EIS) to evaluate potential transportation solutions to improve mobility through the Heber Valley and the operation of U.S. 40.

SCOPING AND PROJECT PURPOSE & NEED

UDOT has initiated the EIS scoping process, which guides the development of the EIS, and will soon release the Draft Purpose and Need and Alternative Screening Criteria. The purpose and need of a project defines a statement of goals and objectives that the study will address (purpose), and identifies the existing and future conditions that need to be changed (need). The purpose and need drives the environmental study process and lays a foundation for the types of alternatives developed. The screening criteria will be used to screen potential alternatives.

Comment period is open from April 30 to June 14, 2021

Comments may be submitted through the website, email, voicemail or sending a letter. Visit the website for more details.
